

FACE SHIELDS

Face shields

For additional protection we are recommending to use a face shield with a medical face mask. They mainly protect against splash and splatter and they can be used multiple times thanks to sanitizers. We are proposing two models of face shields:

- Crown type (worn on the head with 4 modes of regulation)
- Foam type (worn with the adjustable band and a protecting foam on the forehead)

Face shield models

Face shield protects the face against direct contact with droplet-borne microorganisms, e.g. when sneezing or coughing. Unlike masks, it protects the entire face not only the nose and mouth but also the eyes. With face mask it is a great set for protection. We are offering two types, very light and practical ones:

- **Model 1958AT (crown type)** – in this model all elements are made of transparent PET foil and it consists of a slightly triangle shaped shield and a belt with a 4-stage adjustment system. It is worn like a crown, it is put on the head without compression of a rubber band like in the other model
- **Model 2410AT (foam type)** – this model consists of three elements: a rectangular PET shield, thick polyethylene foam at the forehead and a rubber band. The foam has two roles. Firstly, it improves comfort of usage, the forehead does not sweat and does not sore as in the case of a typical helmet. Secondly, it increases protection by elimination a gap at the height of the forehead, preventing the ingress of microorganisms, dust and dirt from above. The elastic band makes it adaptable to any head size.

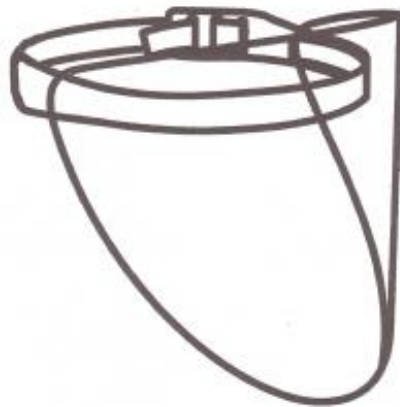

Face shields are transparent thanks to which it can be used with corrective or protective glasses. It does not limit the field of view and one size fits all.

Face shield itself is delivered in a flat form, for self-assembly, which only takes a moment. Disinfect before use.

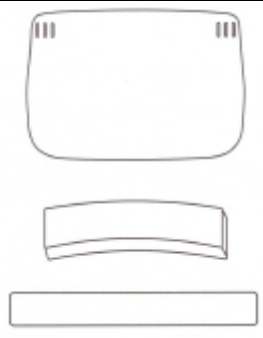

We can customize face shields according to your wish. Make them thin from a 0.30 mm PET foil or thick from a 0.50 mm foil. Foam can be white or grey.

FACE SHIELD SET MODEL 1958AT 0.30 mm (crown type)

<u>MODEL 1958AT (crown type)</u>		
ELEMENT	DIMENSIONS	
Protective Shield	430 mm x 255 mm	
Adjustable strap	680 mm x 30 mm	

FACE SHIELD SET MODEL 2410AT 0.50 mm (foam type)

<u>MODEL 2410AT 0.50 mm (foam type)</u>		
ELEMENT	DIMENSIONS	
Protective Shield	240 mm x 340 mm	
Polyethylene Foam	40 mm x 210 mm	
Rubber Band	20 mm x 40 mm
